Your Partner For Elevator Modernization Projects

STRUCTURAL ENGINEERING CONSULTING FOR ELEVATOR SERVICE COMPANIES

G&G Structures, Inc. provides a comprehensive portfolio of structural engineering and associated services. We have expanded our services to the elevator industry to address recent engineering requirements driven by State and City code compliance for modernization projects.

- HOLLISTER WHITNEY
- TITAN
- IMPERIAL
- DOVER
- ALL MANUFACTURERS

“G&G Structures’ engineers are committed to deliver outstanding client service with creative solutions that are practical for field installation.”

We know that the quality of a project is dependent on our ability to lead the design effort in a direction sympathetic with the client's goals. Our approach is to view each project as worthy of a unique resolution in the design and we believe that is why we are the preferred choice for several large and small elevator services corporations in California.

*Anchorage for machines, grippers, rails, controllers, etc.
 Evaluation for car frames, beams, styles, crossheads, etc.*
